

Red Carpet Rosters Draft Guide

Introduction

The first major and arguably the most important event of any fantasy league is the draft. This is where you and the rest of the managers of the league will get together and take turns selecting players. The draft order is set before the draft by your league commissioner. The draft is a serpentine draft, meaning the order of picks reverses each round. For example, if you have the first pick of the first round, you'll have the last pick of the second round, first pick of the third round, and so on. Another example, if you have the 6th pick in the first round, you'll have the 5th pick in the second round, 6th pick in the third round, and so on for a 10-team league. Once a player gets selected, no one else can stake claim on that player during the draft. Unless you drop that player later in the season, no one else can have that player on their team.

Pre-draft Activities

Your league commissioner will set a draft date. For private leagues, the way they conduct the draft is up to the league and the league commissioner. For public leagues, an email from admin@redcarpetrosters.com is sent with draft information.

Pre-draft default rankings will be loaded on October 1, 2022.

Although not required, you can customize your own pre-draft rankings, but if you do so before the default rankings are loaded on October 1, you risk losing your custom pre-draft rankings. Before October 1, all players are ranked the same. Before the draft, navigate to your **My Team** page by clicking on **My Team** in the top menu. You will be taken to the following screen:

Using the **arrows** to the right, you can move a particular player up or down in ranking. Rankings, as with all fantasy sports, are subjective and do not guarantee those players will truly represent their pre-draft rankings. You may move a player’s ranking up or down in increments of 1, 5, 10, or 50 by clicking on the respective arrow.

These rankings will then be visible in the **Live Draft Module**. These rankings will also be used to

suggest AND autodraft players for your team. If you do not customize your rankings, the default rankings will be displayed in the **Live Draft Module** and used for suggesting and autodrafting players for your team.

You can also use the **Target Picks by Position** feature. Click on **Target Picks by Position** in the upper left corner of your pre-draft rankings to be taken to the page (right.) You will then be taken to a series of dropdown menus. The default is **Best Available**, but you can specify which positions (ex. DIR/SCRN) you want to target in which round. If you use this feature, the

suggested or autodrafted player will be the highest ranked player that carries that position designation. In this example, the best ranked undrafted player that has a DIR or SCRNM position designation will be suggested or autodrafted as your first pick of the draft. Likewise, a Picture (PIC) will be suggested or autodrafted in the second round, and an actress (ACTRS) in the third round. Setting these prevents you from ending up with too many of one position if you primarily relied on autodraft to fill your team's roster.

Once you are satisfied with your custom pre-draft rankings and your targeted picks, you are ready to join the draft.

For private leagues, you can join the draft by selecting **Draft** from your **My Team** page and choosing one of two draft modules: **Basic Draft Module** or **Live Draft Module**, depending on the commissioner's preference. You can also use both in tandem to make sure you are informed of all the draft results. For private leagues, the league commissioner will dictate how the draft is conducted.

NOTE: The **Basic Draft Module** does NOT allow teams to select their own picks. Instead, the commissioner of the league uses this module to make picks on your behalf. For example, all teams are on a videoconference, and they call out to the commissioner what they want to select when it is their turn and the commissioner enters that pick through this module.

For public leagues, the draft will start promptly on the designated draft date and time that was sent in your pre-draft email. If you did not receive an email, check your spam folder and make sure to add admin@redcarpetrosters.com to your safe sender list.

Basic Draft Module

When it is your turn to draft, you will receive an email. Once you log in and navigate to your **My Team** page and click **Draft** from the sidebar menu, you may then check all the draft results leading up to your draft selection. This will help you determine which team has selected which players, so you know who is not available and which positions your opponents have already selected. To do this, we recommend consulting the **Basic Draft Module** before making your selection.

In this example, the team Flip the Birdman has the eighth pick in this 8-team league. You can see that seven picks have already been made, so Flip the Birdman cannot select any of those seven. You can also

consult [Players](#), [Teams](#), and [Draft Order](#) for more information on the draft activities and to help you decide whom to select.

After reviewing the draft results until your turn, you may now enter the [Live Draft Module](#). The option for [Live Draft Module](#) is on the [Draft](#) page within your [My Team](#) page.

You will then be taken to the [Live Draft Module](#), which may take a few seconds to load. When it loads, the page looks like this:

Get Suggestion

The player pool in the center is sorted by [Rank](#). You can also select [Alpha](#) from the dropdown to sort alphabetically. The other dropdown can filter position designation, but these position filters may filter out more than you intend to.

If **DRAFT NOW!!!** appears in the top window, as it does in this example, it is your turn to draft. For public leagues, there is no time limit, so the window on the left will say **OFF**. If there is no **DRAFT NOW!!!** in the top window, that means it is not your turn to draft. The team in **red** at the left is the team whose turn it is to draft a player.

To make your selection, click the player's name in the first column of the player pool. If you have difficulty finding the player you want to draft, use your browser's find feature and search for your desired player's name.

You may also click the [Get Suggestion](#) which will display the top ranked available player from your custom rankings and target position in that round, if you set your [Target Picks by Position](#) preferences. If you did not use custom rankings, the [Get Suggestion](#) feature will suggest the default top ranked available player.

The [Get Suggestion](#) button does NOT draft the player.

To draft a player, that player must appear in the queue box underneath the player pool.

The screenshot shows a draft interface with the following elements:

- Top Left:** A circular logo with a red figure and the text "RED CARPET ROSTERS".
- Top Center:** Large red text that reads "DRAFT NOW!!!".
- Left Panel:**

 - A "League Teams" list with items like "Apple Peach", "Crack the CO", "Flip the Bir", "It's Not Eas", "Just Say Nom", "Moonlight My", "The Shape of", and "X Marks the".

- Bottom Controls:** A "Draft" button and a "Get Suggestion" button are located below the player pool table.

In this example, Flip the Birdman used his Chrome browser's find feature to search for "Yeoh." Then he clicked her name to put her in the queue box, highlighted above. Once the desired player is in the queue box, click [Draft](#) to draft that player.

You will receive confirmation by looking at the top right box, which houses the draft results.

NOTE: If you exit the [Live Draft Module](#), as you will most likely do in public league untimed drafts, no picks will appear in this box. You may use the [Basic Draft Module](#) to get draft results.

When you click “Draft,” your selection will appear in the upper right box, like in the example below:

The screenshot shows a draft interface with the following elements:

- Top Left:** A logo for "RED CARPET ROSTERS" featuring a red figure on a yellow starburst.
- Top Center:** Large red text that reads "DRAFT NOW!!!".
- Top Right:** A light blue box containing the text "Flip the Bir drafted Yeoh,Michelle".
- Left Panel:**
 - A box indicating "Round 2 Pick 1 OFF".
 - A "League Teams" list with "Flip the Bir" highlighted in red.
 - Buttons for "Draft" and "Get Suggestion".
- Center Panel:** A table titled "All Available Players" with columns for Name, Role, and Title. The table lists various players and their associated roles and titles.
- Right Panel:** A chat area with an "Info" dropdown set to "Round 1" and a "Chat" button.

Notice that Michelle Yeoh no longer appears in the player pool. Also notice that the queue box is now blank, and the upper left status box says, “Round 2, Pick 1.” Because this is a serpentine draft, the team with the last pick in the first round has the first pick in the second round, which is why you still see “DRAFT NOW!!!” at the top because Flip the Birdman had the last pick in the first round.

At this point, Flip the Birdman can now make his second selection.

In this example, Hugh Jackman is his next pick. Flip the Birdman clicked on his name in the player pool to put Hugh Jackman in the queue box. Then when he clicks **Draft**, Hugh Jackman will now be on Flip the Birdman's team.

Then you wait until it's your turn to select again and repeat the process.

At any time, you can query the **Basic Draft Module** to keep track of draft results. To get the most up to date results, you can refresh your browser if the draft results do not update in real time.

When you enter the **Basic Draft Module**, you will see the draft results as well as your team's selections.

Notice Michelle Yeoh and Hugh Jackman appear to the right, indicating they are now on your team.

Autodraft

For private leagues, the commissioner can dictate how draft no-shows and expired draft times are handled.

For public leagues, fully formed leagues will begin drafting on October 9, 2022 at 1:00 pm EDT. Whichever team has the first pick in the draft will receive an email when the draft officially starts. When it is your turn to draft, you will receive an automatic email from admin@redcarpetrosters.com, so be sure to add this email to your safe sender list.

Each day, starting on October 10, 2022 at noon EDT, Red Carpet Rosters will check on your draft. To keep the draft moving forward, if the on-the-clock team has been on the clock for 30 minutes or more (i.e. by 11:30 am EDT), their selection will be autodrafted. If the on-the-clock team has been on the clock since after 11:30 am EDT but has yet to make a selection, their selection will be autodrafted 30 minutes afterwards. For example, if it has been a team's turn to draft since 11:46 am EDT and they have not made a selection by 12:16 pm EDT, a Red Carpet Rosters admin will autodraft for that team. Then the next team in the draft order will be notified.

Public League drafts will need to be concluded by October 24, 2022 at 6:00 pm EDT. Any unfinished draft picks by then will be autodrafted by Red Carpet Rosters admins.

For public leagues that are formed after October 25, 2022, drafts will need to be completed by the last day of Matchup #1.

Draft Completion

Once all picks have been made, you may then set your starting lineup from your **My Team** page. If you do not set your starting lineup before Matchup #1 starts, you will receive no points. It is also recommended to check the option for **Update all lineups for future matchups to this starting lineup** the first time you set your starting lineup because your players will be on the bench for each matchup following the draft.
